

SMS - Facebook Account Kit Configuration

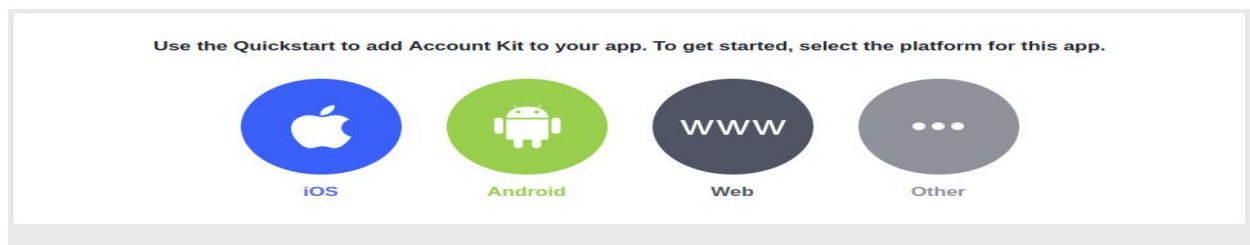

This document help to send sms to worldwide mobile number using facebook sms account kit.

Step:1

1. Login to developers.facebook.com/apps/
2. Create project then click setup in accountkit under products.
3. Follow the steps that mention below

4. Click web from the platform

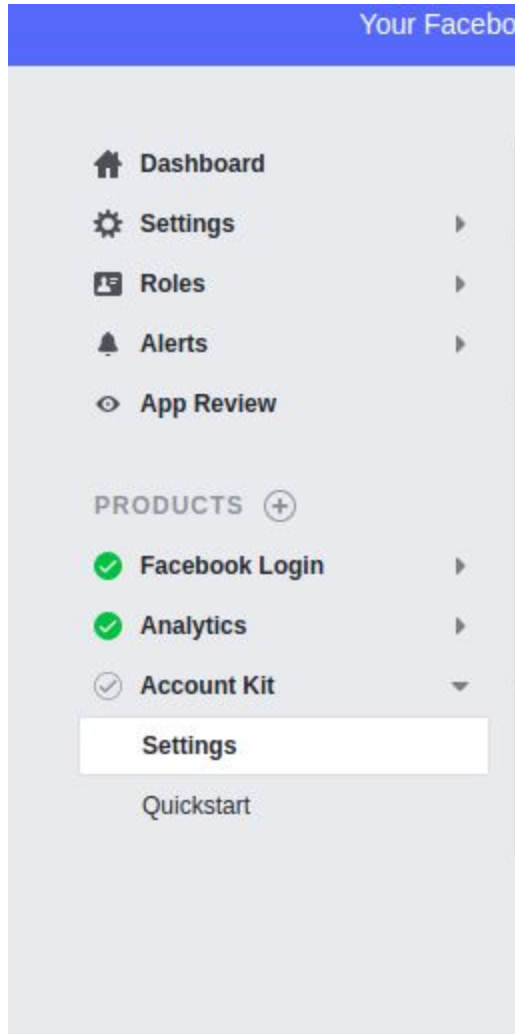

Airfinch – Vacation Rental Script & Apps.

Version – 3.1

5. Then go to settings under the accountkit in side menu.

Click Get started Button.

Airfinch – Vacation Rental Script & Apps.

Version – 3.1

6. In settings, we can get the accountkit secret id and api version. We should use this api version and secret id in accountkit init function in script .

The screenshot shows the 'Account Kit' settings page. On the left is a sidebar with navigation links: Dashboard, Settings, Roles, Alerts, App Review, PRODUCTS (+), Facebook Login, Analytics, and Account Kit. Under 'Account Kit', there are links for 'Settings' and 'Quickstart'. The main content area contains the following settings:

- Account Kit App Secret:** 6677eb0db34b8c19d151f42c45867557
- Account Kit Client Token:** ded24fc810f70116c9718fa16d4e4533
- Account Kit API Version [?]:** v1.0
- Allow Email Login:** ☒ Yes. Send confirmation codes using email.
- Allow SMS Login:** ☒ Yes. Send confirmation codes using SMS.
- Enable Client Access Token Flow:** ☒ Yes. Allows clients to receive user access tokens without a server-to-server call. This option is available for Android and iOS, but not for web login.
- Require App Secret:** ☐ No. Require App Secret for server API calls.

7. We can change the sms template and background color and theme of the sms template in setting page.

The screenshot shows the 'SMS Settings' page. On the left, under 'SMS Template', there is a dropdown menu with the following options:

- Default (selected)
- Use code for app
- This is your code for app
- Use code to log in
- Use code to access
- Your app code is this
- Use code to access app
- Use code to activate account
- Use code as verification
- For your safety, do not share this code

On the right, there are two preview sections:

- Preview:** Use 000000 as your login code for Joysale_accountkit [DEV MODE]. (Account Kit by Facebook)
- Preview:** (Empty box)

Airfinch – Vacation Rental Script & Apps.

Version – 3.1

Tap Next to verify your account with Account Kit powered by Facebook. You don't need a Facebook account to use Account Kit. An SMS may be sent to verify your number. Message and data rates may apply. [Learn how Facebook uses your info.](#)

8. Then we should give the domain url which is used accountkit in Server Domains under **Web Login Settings**.

Web Login Settings

Server Domains - Used for Web SDK

Enter the server domains where you're hosting the Account Kit integration. Login will be allowed from these domains.

Redirect URLs - Used for Web SDK email login / Basic SDK phone number and email login

Enter the redirect URLs where you expect to receive a response from Account Kit. Login will only redirect to these URLs.

Country Codes Whitelist

Web Login will be allowed for phone numbers with these country codes. To allow login for all country codes, leave this blank.

Country Codes Blacklist

Web login won't be allowed for phone numbers with these country codes.

9. Then click save changes .

10. We can get the appid and secret id from basic settings.

The screenshot shows the 'Basic' settings page in the Airfinch admin panel. The left sidebar contains navigation links: Dashboard, Settings (expanded), Basic (selected), Advanced, Roles, Alerts, App Review, PRODUCTS (+), Account Kit, and Activity Log. The main content area is divided into two columns. The left column contains: App ID (227471154492036), Display Name (Joysale_accountkit), App Domains (empty), Privacy Policy URL (Privacy policy for Login dialog and App Details), and App Icon (1024 x 1024) with a placeholder image. The right column contains: App Secret (0097b1fe126734ac5d9ae2ec6d78cfa9) with a 'Reset' button, Namespace (empty), Contact Email (socialapps@hitasoft.com), Terms of Service URL (Terms of Service for Login dialog and App Details), and Category (Choose a Category dropdown). A link 'Find out more information about app categories here' is at the bottom right.

11. To make the app **LIVE**, Give the valid privacy policy URL in basic settings and save changes.

12. Update Facebook App id and Secret Key in your site admin panel “Mobile SMS Settings” section.
